

AutoConnect Area Lighting

Designed to replace 50-400 watt HPS fixtures, the innovative AutoConnect Series uses new silicone optics which provide exceptional efficiency with improved thermal performance, uniformity and visual comfort.

The AutoConnect family features trusted DTL® and nLight® controls options, as well as next generation D4i® digital drivers. Combined with wide variety of lumen packages, advanced control options and user-friendly installation features, the AutoConnect is an ideal solution for parking, pedestrian and other area applications.

Key Benefits to the AutoConnect Series

- 50-400 watt HPS replacement
- Industry-leading optics improve visibility and visual comfort
- Zero-uptight distributions to reduce light pollution
- 2700K - 5000K CCT, 70CRI minimum
- Best-in-class efficacy (lpw) and 20kV/10kA surge protection
- Digital drivers with pre-loaded asset data and field diagnostic capabilities
- New embedded DC powered controls synergize with digital drivers and showcase Acuity Brands® vertical integration
- Bluetooth® wireless technology option for point-to-point control
- Tool-less features for simplified installation & maintenance

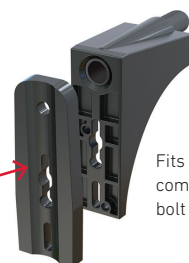

Decorative Universal Arms

The new Decorative Arm option provides an attractive daylight form factor for the AutoConnect series with a seamless blend of shape from the fixture into a round or square straight poles. You can now benefit from the high performance and visual comfort of the AutoConnect series when lighting parking lots, parking decks, commercial parks, and other outdoor area lighting applications.

The new AutoConnect arm fits most manufacturer hole patterns, and of course, you can get the arms in variety of colors to match your AutoConnect fixtures and poles, complete with the highly durable finish available on all AutoConnect products.
