Get off the job faster with
nLight® AIR Lighting Controls

Easier Installation to Drive the Lowest Installed Cost

nLight AIR continues to drive the lowest installed cost with the introduction of the rCMSB: a battery-powered wireless ceiling-mount sensor. With no wires to install, simply mount it to the ceiling, pair it with nLight AIR switches and fixture-based controls via a mobile app, and you're done. It's that easy.

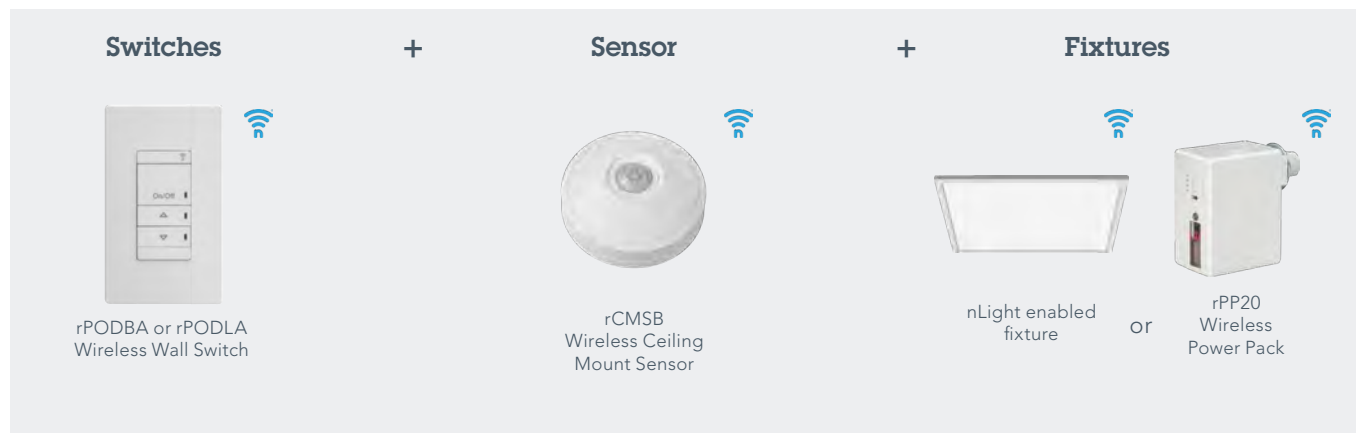

Features and Benefits

- **EASY INSTALLATION** with no wiring, 10-year battery life, and programming using a free mobile app
- **COMPREHENSIVE LENS OPTIONS** with up to 40 ft. mounting height
- **MOTION SENSING/DAYLIGHT HARVESTING** in one sensor reducing the number of products to specify and install
- **PASSIVE DUAL TECHNOLOGY (PDT)** with PIR/Microphonics™ looks and listens for occupants ensuring a higher level of detection
- **RECESSED MOUNT OPTION** takes the tools out of your hands, installing in a standard 3" hole and delivering the lowest profile of any independent occupancy sensor
- **THE MODERN AESTHETIC & SMALL SIZE** of the rCMSB delivers a clean look across the ceiling

Lowest Cost of Install with nLight Lighting Controls Platform

Specify and install a wireless solution all on one lighting controls platform, nLight. It's as simple as selecting a wireless switch, wireless sensor, and power pack or enabled luminaire that fits your retrofit or new construction projects.

+

Easily network your entire site by adding the nLight ECLYPSE® controller

Benefits

- Advanced Scheduling
- Remote Programming through the Network
- BACnet® Integration and More....
