

MARK ARCHITECTURAL LIGHTING™

Chisel™

Shape Your Lighting Experience with Ease

Not all lighting solutions deliver energy efficiency with design creativity. Chisel™ by Mark Architectural Lighting™ enables you to add dimensionality to your space with the soft, volumetric and energy-efficient lighting people desire.

Impactful lighting experiences

- Easily create experiences with five sizes available, allowing for the flexibility of creating linear rows or clusters
- Create dimensionality and strengthen natural lighting effects with three textures and four directional gradients

Easy integration into your interior space

- Indirect illumination with Tunable White functionality ensures customizable, soft indirect illumination
- Minimalist design adapts to surrounding pre-existing design
- Optional for 2x2: Clear, acrylic lens blends seamlessly into the architectural design, allowing for easy wipe-down maintenance

Affordable, quality lighting

- Use Chisel in its simplest form, or create options for any budget with added elements
- nLight® AIR wireless control option simplifies installation, saving energy and deployment costs

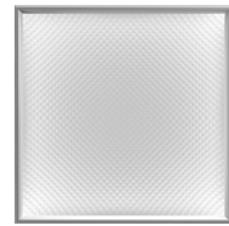

Make Your Mark with Chisel

Textures

Choose a reflective texture to provide a range of luminous appearance.

Minimalist

Weave

Pyramid

Single

Corner

Parallel

Full

Directional Gradients

Illuminate from one side or multiple sides for a natural sense of movement without reducing lumen output or light quality.

Forms

Select from up to five different forms and create diverse clusters or a conventional grid.

1'x2'

2'x2'

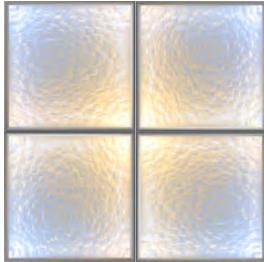

2'x4'

6"x4'

1'x4'

Mainstream Dynamic™

Tunable White allows designers to include white light into their scenes—matching the optimal light for different activities or to complement colors or materials within a visual environment.

CCT Contrast™ and Optional Lens

Employ 2700 to 6500K color temperatures in opposite directional gradients, resulting in a spectacular splash of color and contrast for beautiful accents, clusters and patterns.

Optional Lens

The clear, recessed, acrylic lens blends seamlessly into the architectural design of Chisel, allowing for easy wipe-down maintenance.

nLight® and nLight® AIR

The nLight® networked digital lighting control system is easy to use, easy to install and saves energy. Using only standard CAT-5e cable, nLight networks together occupancy sensors, wall stations, and digital LED luminaires to create a digital lighting system with unmatched flexibility. nLight AIR is a simple wireless lighting control solution complete with Acuity Brands LED fixtures with embedded smart sensor and wireless nLight AIR wall switches.
