# SPOTLIGHT ON: LIGHTING TAILORED TO WAREHOUSES

## IBG High Bay by Lithonia Lighting®

The versatile I-BEAM® IBG LED high bay boasts a single base platform design with a wide selection of options, taking IBG from basic applications to complex environments, including unconditioned spaces. The result is the maximum performance you need at the lowest possible cost.

## Compact Pro™ High Bay by Lithonia Lighting

The Compact Pro High Bay by Lithonia Lighting is the most compact high bay on the market, making it easier and quicker to install. Built with quality to last and performance to get the job done. At the price you need to win.

## CLX LED Strip Light by Lithonia Lighting

A versatile, ultra-efficient LED strip lighting solution that can meet the challenges of your industrial, retail, warehousing and task lighting applications. Multiple lengths, lenses and mounting options put you in control of your application whether it be for performance, aesthetics or the newest techn

## OPTIMIZE WITH CONTROLS

Use lighting controls to maximize energy savings, address code requirements, and increase occupant comfort, with a tailored solution to meet the needs of your warehouse. Choose networked lighting controls from nLight® for optimized building wide strategies or stand-alone lighting control solutions from SensorSwitch™ for single applications. Simplify specification and design by selecting nLight or SensorSwitch enabled luminaires available with embedded controls within the luminaire or integrated controls attached to the luminaire. Additionally, compatible controls are individually available for separate shipment and field installation.
