# SPOTLIGHT ON: LIGHTING TAILORED TO K-12 SCHOOLS

## SLOT 2 Linear Lighting

by Mark Architectural Lighting

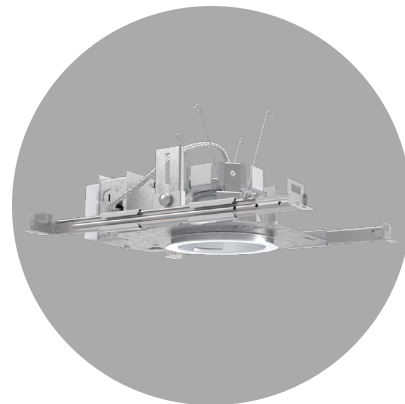

Combining a compact profile with unparalleled performance, the Slot 2 family creates simple lines of light. Make a bold statement with patterns or create lines of light with linear runs.

## STACK Family LED Lay-In Lights

by Lithonia Lighting®

The next generation of center-element LED lay-in lights each purpose-designed to be the solution for any need. High performance and expanded configuration opportunities all in a new aesthetically pleasing form factor. With millions of configurations available, STACK is the ideal solution for any project.

## LDN Commercial Downlighting Family

by Lithonia Lighting®

The LDN family provides the best value in downlighting. Their general illumination performance provides a glare-free experience without compromising efficacy. With multiple aperture sizes, shapes, forms, drivers, and control options, you have a simple and flexible solution for any new construction project.

## OPTIMIZE WITH CONTROLS

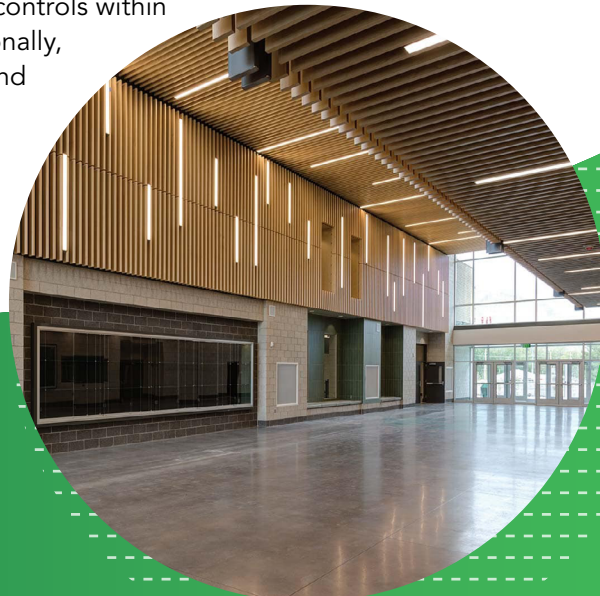

Use lighting controls to maximize energy savings, address code requirements, and increase occupant comfort, with a tailored solution to meet the needs of your K-12 school. Choose networked lighting controls from nLight® for optimized building wide strategies or stand-alone lighting control solutions from SensorSwitch™ for single applications. Simplify specification and design by selecting nLight or SensorSwitch enabled luminaires available with embedded controls within the luminaire or integrated controls attached to the luminaire. Additionally, compatible controls are individually available for separate shipment and field installation.
