# LIGHTING AND LIGHTING CONTROLS FOR FREESTANDING ERS

SCAN ME

# EXCEPTIONAL PRODUCTS, SERVICES, AND TECHNOLOGY TO HELP DIFFERENTIATE FREESTANDING ER PROJECTS

Lighting for your freestanding ER should provide the necessary light levels required for staff to treat patients quickly and effectively while also providing a comforting environment for patients experiencing a stressful situation. Achieve this balance while reducing energy and maintenance costs with a broad portfolio that will ensure your facility is always ready – even in an emergency.

## FIND RECOMMENDED LIGHTING SOLUTIONS FOR FREESTANDING ERS

Lighting and controls solutions tailored to Freestanding ERs, combined with the information you need to complete your project. Get spec sheets, BIM and IES files, utility rebate calculations and customer program information such as Contractor Select™ and Design2Ship.

# SPOTLIGHT ON: LIGHTING TAILORED TO FREESTANDING ERs

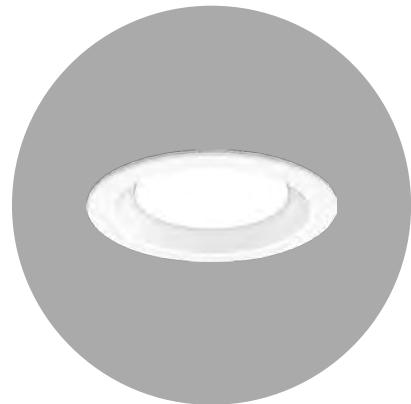

## HSTL by Healthcare Lighting

Healthcare requires a focused hand and even more focused lighting. Using dual-color channels and optional nLight® controls, the new HSTL Troffer from Healthcare Lighting delivers powerful illumination and color accuracy for a medical team's visual acuity.

## AccoLED by A-Light

Provide clean lines with high performance direct and indirect distribution, for a functional and aesthetically pleasing slim profile. Engineered with options for a remote driver and special non-ferrous fixture components to be suitable for most healthcare applications.

## EVO® 6" Round Healthcare by Gotham Lighting

General illumination LED downlight and wall wash for a variety of healthcare applications. Provide uniform, wide angled illumination on horizontal and vertical surfaces for optimal visibility in these critical spaces.

## OPTIMIZE WITH CONTROLS

Use lighting controls to maximize energy savings, address code requirements, and increase occupant comfort, with a tailored solution to meet the needs of your freestanding ER project. Choose networked lighting controls from nLight® for optimized building wide strategies or stand-alone lighting control solutions from SensorSwitch™ for single applications. Simplify specification and design by selecting nLight or SensorSwitch enabled luminaires available with embedded controls within the luminaire or integrated controls attached to the luminaire. Additionally, compatible controls are individually available for separate shipment and field installation.

## #BEAUTIFULSPACES FOR FREESTANDING ER

# USEFUL TOOLS FOR YOU

## Application Guides

Reference guides to make code compliance on your project quicker and easier.

## Controls Typicals

Typical controls layouts for the different spaces of your project.

## Utility Rebate Search Tool

Tool powered by Encentiv Energy to help you find estimated utility rebates in your area based on your product selection.

## Visual Lighting Software

A software tool to help you develop a lighting design for indoor and outdoor spaces.

## Visual Controls Software

A desktop application to help speed up the process of designing your space with controls.

## Augmented Reality Mobile Application

Mobile application to make visualizing lighting fixtures in your space a breeze!
