# SPOTLIGHT ON: LIGHTING TAILORED TO MEDICAL OFFICE BUILDINGS

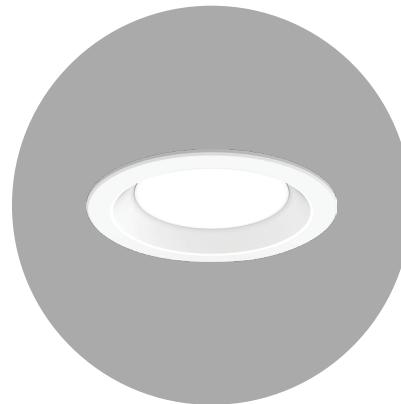

## HSTL by Healthcare Lighting

Healthcare requires a focused hand and even more focused lighting. Using dual-color channels and optional nLight® controls, the new HSTL Troffer from Healthcare Lighting delivers powerful illumination and color accuracy for a medical team's visual acuity.

## AccoLED by A-Light

Provide clean lines with high performance direct and indirect distribution, for a functional and aesthetically pleasing slim profile. Engineered with options for a remote driver and special non-ferrous fixture components to be suitable for most healthcare applications.

## EVO® 6" Round Healthcare by Gotham Lighting

General illumination LED downlight and wall wash for a variety of healthcare applications. Provide uniform, wide angled illumination on horizontal and vertical surfaces for optimal visibility in these critical spaces.

## OPTIMIZE WITH CONTROLS

Use lighting controls to maximize energy savings, address code requirements, and increase occupant comfort, with a tailored solution to meet the needs of your medical office building project. Choose networked lighting controls from nLight® for optimized building wide strategies or stand-alone lighting control solutions from SensorSwitch™ for single applications. Simplify specification and design by selecting nLight or SensorSwitch enabled luminaires available with embedded controls within the luminaire or integrated controls attached to the luminaire. Additionally, compatible controls are individually available for separate shipment and field installation.
